RECOMMENDATIONS

Vrushali Gerappe, MD. Sleep Medicine / Psychiatry at Swedish Medical Center.

I've known Jeff since 2010 when I worked at Sound Sleep Health as a sleep physician. He has been a key employee who takes care of the software systems in the sleep lab and in the clinics. I have always been impressed by his outstanding diligence and his high level of technical expertise. He has tackled every project assigned to him with enthusiasm and competence. He invariably understands exactly what a project is all about from the outset, and how to get it done quickly and effectively. He consistently produces superior quality work, on time, and within budget targets especially where time is of essence in a clinical setting. I recommend Jeffery Smoots very highly for any position in the IT field that involves complexity and creativity, with high quality requirements. He is not only an exceptionally bright and hardworking person who will do his very best to do an outstanding job for whomever he works with but he is a great person to know and easy to get along well with. [October 8, 2018, via LinkedIn]

Richard J. Pisani, MD. Physician / Owner, Pacific Sleep Center.

I am writing on behalf of Jeff Smoots. Between 1995 and 2005 he worked in my medical office as sole architect of software we used to run our sleep medicine practice. At our weekly business meetings, our team asked Jeff if the software could be made to address any number of clinical and administrative issues. Jeff always delivered. He was also fundamentally critical in assisting me prepare 11 abstracts over the course of a decade at medical professional society meetings. All of this from a soft spoken individual who is a pleasure to work with. I recommend him without hesitation. If you have further questions, email me at rjpisanimd@yahoo.com. [October 3, 2018, via LinkedIn]

Ernesto Brauer, MD, FACP, FCCP, D, ABMS. Physician at Aurora.

I am writing to HIGHLY recommend Jeffrey Smoots to his next phase in life. I have known Jeffrey for many years and admire his work and character. He will be sadly missed but I am sure will contribute to his next endeavors. [October 2, 2018, via LinkedIn]
